

Project Management Training and Networking Events

Projects Network

Projects in the modern environment are becoming more complex. The management of such projects require more than adaptability and traditional management skills. At this networking session, you will be introduced to complexity theory and approaches to manage your projects successfully. The theme of this session is “Complexities in Projects”.

Topics will include:

- Project Complexities– by guest speaker **Collin Smith**; Managing Director and CEO ICCPM
- Project Case Study: **Academic Structure Implementation** – **Peter Tow**; Director Project Management Office
- Workshop – Identifying simple, complicated, complex or chaotic projects

DATE 1 May 2019
TIME 1:30pm – 4:30pm
VENUE Frogmore House, Werrington North

of ICCPM.

Intermediate Project Management

This course is the second in a three-part training series that will provide you with underlying knowledge and best practices to manage a range of projects. It will build on your understanding of project management basics and will take a structured approach to managing and tracking your projects to achieve your goals. The course will also focus on stakeholder engagement, communications and project team management.

Learning outcomes:

- Define the project life cycle in the University context
- Develop a project baseline with defined schedule and budget
- Provide tips and best practices for successful stakeholder engagement and communications
- Understand project tracking and change controls
- Build a successful project team
