Project Management Office

Projects @ Western Framework

The Projects @ Western Framework course sets out the principles, project life cycle, processes and practices under which projects are initiated and managed at the University. This course:

- Provides an overview of the framework to support successful delivery of project outcomes aligned to Western's strategic objectives
- Focuses on how the Projects @ Western Framework is applied across the project life cycle

Since every project relies on the people, governance and organisation context to be successful, it is intended for staff at all levels.

Projects @ Western

It complements our three-part Project Management training series that will provide you with underlying project management knowledge and best practices to successfully manage any type of project.

Projects Network Event

A networking opportunity among experienced and aspiring Project Practitioners where we will delve into engaging and interactive discussions to explore new ideas and approaches. The **theme** of this session is:

“Re-imagining the Project Manager of the Future”

COVID-19 has forced many companies to fast track their digital transformations. Organisations need project professionals with the right skills to respond to the accelerated change. Project Managers need to be equipped with new skills and abilities to be successful in the disrupted workplace. We must re-imagine Project Management to stay relevant and effective in the changing digital work environment. Project professionals who thrive in the future will be those who are able to adapt and strive in the changing digital environment.

Date: Tuesday 16 June 2020
Time: 9:30am – 11:30am
